

Featuring a wrap-around “book-cover” design, the Extreme Shell-S delivers rugged, all-around coverage and a solid grip with our new MAXGrip spine, designed to also protect the vulnerable hinge area. Tough TPU bumpers safeguard edges, while corners get extra care with an enhanced, air-cushioned top that overlaps the closed device for added drop protection. Made of compound polycarbonate, thermoplastic and polyurethane, the rigid top and bottom panels add scratch-resistant protection against dings, drops and bumps. The textured, MAXGrip spine gives students a solid grip, helping prevent drops. Non-slip feet plus the textured spine wrap make for super-stable typing, and IT staff will appreciate the fast, one-piece installation and easy visibility to asset tags. With a snug, perfect fit, the Extreme Shell-S supports all device functions and provides easy port access.

## Extreme Shell-S<sup>®</sup>

Prevents drops & damage with MAXGrip 360° protection

# Extreme Shell-S®

Prevents drops & damage with MAXGrip 360° protection
